

# Empty

I could pursue a life of my own      But following you is all I have known  
I could attempt to chase all my dreams      But why bother if you can't share them with me

This is not all right      So I put up this fight

**(Chorus) I've spent time      I've spent energy**  
**Searching for something to comfort me**  
**I've been strong      And completely weak**  
**Screaming and angry and on my knees**  
**Up against this wall      Without you it all      feels empty**

I could traverse the ends of the earth      But without you there it hasn't much worth  
I could retreat and try to escape      But where could I go that there isn't this pain

And oh it hurts so much      That I can't feel your touch

**(Chorus) I've spent time      I've spent energy**  
**Searching for something to comfort me**  
**I've been strong      And completely weak**  
**Reaching and broken and on my knees**  
**No further can I fall      Without you it all      feels empty**

**(Bridge) I'm longing for home      The way that it was**  
**You so alive      Existing with us**  
**I cannot think of you as a memory**  
**But as someone who is      And not someone who's been**  
**Yet you are gone      You were taken away**  
**And for what cause?      Tell me where is the case?**  
**So I will grieve      And feel this great loss**  
**Proof of my love that was purchased      with a great cost**

**(Chorus) I've spent time      I've spent energy**  
**Searching for something to comfort me**  
**I've been strong      And completely weak**  
**Bleeding and wounded and on my knees**  
**I do not understand      This is not what we planned**  
**No matter how I call      Without you it all      feels empty**
