

My Best Friend

You came dancing on the air And drove away all my despair
You captured me with all your love You are all that I have dreamed of
When you waltzed into my life I had no clue I'd be your wife
Or that you would become my own And we would share the greatest love I've known

(Chorus) And I know That wherever you go I will follow you
I'm so near The end of all my fears in your love so true
And I feel The love we share is so real it will never end
Now I see That we are meant to be
You're my best friend

You will be my only lover As we hand in hand discover
The destiny of you and me Beginning our own family
I will follow where you lead And as you give to me your seed
Our love will be consummated Within my womb new life will be created

(Chorus) And I know That wherever you go I will follow you
I'm so near The end of all my fears in your love so true
And I feel The love we share is so real it will never end
Now I see That we are meant to be
You're my best friend

(Instrumental)

(Bridge) And as we find all that we seek The days will swiftly turn to weeks
The weeks to months and months to years...
Then we'll recall How we started here...

Where at this place to you I gave My heart my soul and all I saved
I gave to you my very best My everything and nothing less
And after all is said and done The race complete and we have won
My life will show you were the one And we'll have only just begun
Eternally becoming one...

(Chorus) And I know That wherever you go I will follow you
I'm so near The end of all my fears in your love so true
And I feel The love we share is so real it will never end
Now I see That we are meant to be
You're my best friend
